

# AWS Management and Operations Week

Management and Operations Week at the AWS Loft is an opportunity to learn about Amazon's broad and deep family of managed tools and services. These services provide easy, scalable, reliable, and cost-effective ways to manage your resources and applications in the cloud.

We explain the fundamentals and take a technical deep dive into **AWS Service Catalog, AWS Systems Manager, AWS Config, AWS CloudWatch, AWS CloudTrail, AWS CloudFormation** and ITSM integrations. You will learn how to get started, how to support applications, and how to scale.
